NeonPine documentation

Document	Purpose
../DESIGN.md	Design description, schematic notes, layout, BOM, **open items before market**
NeonPine-schematic.pdf	Schematic
user-manual.md	User manual + safety information (EN draft)
manufacturing.md	PCB spec, assembly, programming, end-of-line test, traceability
mcu-netlist.md	Reduced netlist for firmware: U1 pin map, 74HC595 bit order, lamp drivers, peripheral / option-byte setup (generated by `tools/mcu_netlist.py`)
compliance/00-regulatory-roadmap.md	What applies (CE / UKCA / FCC / ICES), what doesn't, status tracker
compliance/01-risk-assessment.md	GPSR risk assessment, hazard register, verification record
compliance/02-emc-test-plan.md	EMC design review, rev B measures, pre-compliance & lab test plan
compliance/03-materials-compliance.md	RoHS / REACH evidence per BOM line
compliance/04-eu-declaration-of-conformity.md	EU DoC template
compliance/05-fcc-sdoc.md	FCC SDoC + mandatory user statements
compliance/06-labelling-and-packaging.md	Product / packaging markings
compliance/07-technical-file-index.md	Technical file contents and status

`python3 tools/docs.py` regenerates the schematic PDF, the renders in `img/` (`kicad-cli pcb render`), `mcu-netlist.md`, the `fab/` outputs and all PDFs except the compliance documents; run it after every schematic or layout change.
